DOCUMENT 12024

SAVAGE CFS C-Frame Straightening Presses are used to straighten round bars, shafts, tubes, and screws. Shafts can be straightened from their centers or from their O.D. All presses have 60" wide beds for full tonnage (available to 96") with extension tables available to support and indicate longer workpieces.

150 ton Model with Extension Tables and Straightening Accessories

- Self-contained hydraulics
- User-friendly, one-day training development for skilled operation
- Optional powered straightening accessories eliminate heavy lifting
- Robust fabricated construction for long life and durability *(No castings are used in our machines.)*

750 ton Model

CONTROLS

- Electronic stroke control stops ram within $\pm .001$ " of setpoint
- Joystick operation permits operator to "feel" the work
- Ram positioning controller for precise straightening
- Ergonomic operator controls

OPTIONAL ACCESSORIES

- Bed extension tables (available 5' – 30') for indicating long workpieces
- Quick Change dovetail ram punch adapter
- Brass inserts prevent scratching of polished workpieces
- Straightening Fixtures include:
 - Adjustable Carriages with O.D. Rollers
 - Centering Rollers
 - Flat Anvils or V-Anvils
 - Indicators

40 ton Model with Extension Tables and Straightening Accessories
