10 TO 3000 TON CAPACITIES AVAILABLE

Savage Four-Post Press platens are guided on large diameter hard-chromed guide rods through eight (not four) bronze bushing assemblies. Each pair of bushings are separated in extra-long sealed bushing tubes for a generous bearing ratio. Savage presses have noticeably longer guides. The extra length improves guidance and accuracy, and reduces wear.

SAVAGE HYDRAULIC PRESSES ARE APPLICATION-SPECIFIC AND JOB-ENGINEERED

Tonnage, bed size, stroke, daylight openings, and speeds are all customer-selected to meet your exact specifications

200 ton Four-Post Press

Four-Post presses up to 60" wide are of solid plate construction.

- Overhead power unit minimizes floor space requirement
- Long guide length
- Removable T-slotted bolsters
- Movable remote control station
- Light screen barrier guards
- Ram stroke control accurate to .001"
- Swing-in safety platen block available
- JIC components

400 ton Four-Post Press

Four-Post presses wider than 60" require fabricated weldments.
